

THE MVP™

1:1 RATIO POLYUREA PUMP

- Manual Operation
- Positive Displacement Pumping System
- Ball Valve Gun
- Easy To Troubleshoot, Clean & Maintain
- Work Environment Friendly

MVP™ Polyurea Pump Advantages

1. Manual Operation: No generator/compressor/extension cords results in a lighter weight, easily maneuverable cart. The MVP's handles are removable to aid in transportation.
2. Positive Displacement System: A far more accurate system than gear or hydraulic – driven pumps thereby keeping materials on ratio more consistently.
3. Ball Valve Gun: Easy on/off dispensing wand
4. Troubleshooting/Cleaning & Maintenance: The simplicity of the MVP's positive displacement system results in extremely fast & easy troubleshooting, cleaning and maintenance of the pump. Replacement of o-rings & seals can be done in less than 30 minutes. Rebuilding costs are minimal compared to gear/hydraulic systems.
5. Work Environment Friendly: No noise or gas fumes results in a more pleasant, safer work environment.
